TO WHOSOEVER IT MAY CONCERN

This is to certify that Waste Encare (India) Pvt. Ltd; have worked as turnkey process and project contractors for our Common Effluent Treatment Plant (CETP) at Dombivli, MIDC, Phase-I

The CETP capacity is 14000 m³ / day and the total cost of the project was about Rs. 630.00 Lakhs. The scope of services for Waste Encare (India) Pvt. Ltd. included: -

- Sampling, Analysis and Data Generation.
- Treatability Study, Preparation of Feasibility Report and detailed Project Report
- Obtaining approvals from Indian Institute of Technology (IIT), Maharashtra Industrial Development Corporation (MIDC), Maharashtra Pollution Control Board (MPCB), and Ministry of Environment & Forests (MOEF), Delhi.
- Basic and detailed Engineering and design for all civil, mechanical, electrical, piping and instrumentation work for the CETP.
- Procurement / Tendering and Vendor / Contractor Management
- Supervision and Project schedule Management during execution.
- Trial Runs, Commissioning and Operation of CETP.

The entire project was completed in a span of about 2 years.

The CETP major treatment units consists of:

- Primary treatment of screening, equalisation, chemical coagulation and settling.
- Secondary Aerobic Biological Oxidation System with secondary settling tank using state of art power conserving aerators / mixers in the aeration tank.
- Sludge thickening and dewatering system using solid bowl centrifuge.

We are satisfied with the timely services and technical soundness of Waste Encare (India) Pvt. Ltd; and do not hesitate to recommend them for similar projects. As such Waste Encare (India) Pvt. Ltd. have been retained for operation & maintenance of this 14 MLD CETP and the order value for this service being approx. Rs. 8,50,000/- per annum.
